

Sec. 94-306. - Height exceptions.

- a. *Exemptions to height limits.* Heating, ventilation, and air conditioning equipment; church steeples, bell towers, flag poles, chimneys, parapets, stair enclosures, tanks, decorative features, elevator hoistways or equipment, television or radio antennas, and related mechanical or functional features may exceed district height requirements by ten percent.
- b. *Federal Aviation Administration approval required.* The height of structures, including exempt items or equipment, shall not exceed limitations prescribed by the Federal Aviation Administration within designated flight approach patterns of airports or related aviation facilities as on file with the planning and zoning administrator.

(Code 1979, § 33-113; Ord. No. 3744-04, § 4, 9-27-2004)
