## **Sec. 94-406. - Illumination of signs.**

---

Except as otherwise provided in this chapter, signs shall be illuminated only as follows:

1. By lights placed inside a cabinet sign with an opaque or a translucent background and translucent copy;
2. By lights placed inside individual pan-channel letters;
3. By halo lights placed behind individual reverse pan-channel letters;
4. By lights which are directed to shine directly on the sign. Such lights shall be directed and/or shielded so as not to shine directly unto neighboring property or the eyes of passing motorists;
5. By exposed incandescent bulbs, if such signs give time or information; or
6. By exposed neon lighting.

(Code 1979, § 33-155)
